## QUIZ

### PHOTOSHOP TOOLS Q'S (10 pts)

1. How do you import an image?  
Go to File then click Place Embedded and pick your picture on the pop-up menu and hit PLACE. It will import your image at the top of your layers menu. OR you can drag the picture from your desktop or folder and drop it into photoshop. It will also be placed at the top
2. What tool do you use to make an image smaller, where is it located?  
Using the Crop Tool which is located on the toolbar on the left.
3. What are the steps to create a gradient effect?  
With the gradient tool, go to Layer > New Fill Layer > Gradient > Name the new layer and change the gradient color by clicking the Gradient Tab.
4. What tool do you use to grab a specific design element? How?  
Use the Select Tool and make sure that you are on the correct layer before trying to grab and move something.
5. How do you move an image in front of another, overlap?  
Using the pop-up layers menu, move the desired layer above the layer that is needed on the background and at the top of the list to make it the top image.
